1. Executive Summary

Ranukita scanned Upwork, Freelancer, Fiverr, and Contra for automation-focused gigs matching our Python/Scraping/Bot/Integration stack. 12 qualified gigs found with budget >\$200 or high match potential.

Total estimated revenue from top 5 gigs: \$7,500+ fixed, plus ongoing hourly retainers.

Best matches (score >90%): Trading Signal Bot, Telegram Bot Backend, and Blockchain Data Scraper — all leverage Emilio's existing crypto bot and Telegram automation experience.

4. Proposal Template — Ready to Send

Hi there,

I saw your project and it matches my expertise perfectly. I am a Systems Engineer and Python developer with 8+ years of experience building automation bots, web scrapers, and API integrations — including production crypto trading bots and Telegram automation systems.

What I can deliver:

- Clean, production-ready Python code with documentation
- Automated testing and error handling
- Deployment and ongoing support if needed

I can start immediately and would love to discuss your requirements in more detail.

Best regards,

Emilio Ranucoli

5. Recommended Actions

- Apply TODAY to gigs #1 (Trading Signal Bot) and #3 (Blockchain Scraper) — highest budget + best match
- Apply to #2 (TG Bot Backend) — long-term retainer = stable monthly income
- Customize proposal per gig: mention relevant projects (GARYCIO bot, crypto trading bots)
- Set daily reminder to check new listings at 9:00 AM
- Consider creating Upwork portfolio items for GARYCIO and crypto bot projects
