6. EMAIL: Cocos Accessibility Audit — 3 WCAG 2.1 compliance gaps	4
7. EMAIL: belo.app — 3 accessibility issues found (free audit)	4

1. Resumen Ejecutivo

- Objetivo: convertir prospectos en clientes de auditoria ADA (\$500-2000 USD por auditoria completa)
- Propuesta: auditoria gratuita de 1 pagina -> upsell a auditoria completa + remediacion
- Canal: email directo + LinkedIn follow-up

2. Lemon Cash — Problemas detectados

- WCAG 1.3.1 — Contenido DOM duplicado: Footer y legales se renderizan 4x en el DOM. Los lectores de pantalla leen todo repetido.
- WCAG 2.4.1 — Sin skip-navigation: No hay enlace Skip to main content. Usuarios de teclado deben tablear toda la nav.
- WCAG 4.1.2 — FAQ sin semantica ARIA: Preguntas frecuentes son texto estatico sin roles accordion ni aria-expanded.

3. Cocos Capital — Problemas detectados

- WCAG 4.1.3 — Datos dinamicos sin ARIA live: Precios de acciones se actualizan en tiempo real pero screen readers no pueden anunciar cambios.
- WCAG 1.3.1 — Widget de compra sin labels: Campo de monto usa solo placeholder text, sin label asociado.
- WCAG 4.1.2 — Mega-menu sin roles ARIA: Menu multinivel no implementa aria-expanded ni aria-haspopup.

4. Belo — Problemas detectados

- WCAG 1.3.1 — Bloques DOM repetidos: Hero y cards se renderizan 3-4 veces para breakpoints responsive.
- WCAG 1.1.1 — Emojis como contenido informativo: Iconos de pais y viaje transportan significado pero carecen de aria-label.
- WCAG 1.3.1 — Testimonios sin estructura semantica: Reviews de usuarios son texto plano sin blockquote ni cite.

5. EMAIL: Accessibility gaps on lemon.me — free 1-page audit inside

- Hi Lemon Cash team, I ran a quick WCAG 2.1 scan on lemon.me and found issues that could expose you to legal risk, especially with 4M+ users.
- 1) Duplicated DOM content — Footer renders 4x, confusing screen readers.
- 2) No skip-navigation — Keyboard users tab through entire nav before content.
- 3) FAQ lacks ARIA semantics — No accordion roles or aria-expanded.
- I have a free 1-page snapshot with severity ratings and fix recommendations. Want it?
- We're Ranuk IT Solutions — we help fintech companies ship WCAG 2.1 AA-compliant experiences.
- Emilio Ranucoli | Ranuk IT Solutions | emilio@ranuk.dev | ranuk.dev/ada-audits

6. EMAIL: Cocos Accessibility Audit — 3 WCAG 2.1 compliance gaps

- Hola Cocos team, Your platform handles real money — accessibility needs to be bulletproof. I found 3 issues:
- 1) Dynamic pricing lacks ARIA live regions — screen readers can't announce price changes.
- 2) Dollar widget missing input labels — placeholder text instead of proper labels.
- 3) Mega-menu lacks ARIA roles — keyboard nav breaks at level 2.
- With 1M+ users, these are compliance gaps creating legal exposure.
- I have a complimentary 1-page WCAG snapshot. Just say the word.
- Emilio Ranucoli | Ranuk IT Solutions | emilio@ranuk.dev | ranuk.dev/ada-audits

7. EMAIL: belo.app — 3 accessibility issues found (free audit)

- Hi Belo team, Checking belo.app, I found 3 issues blocking 15% of potential users who use assistive technologies:
- 1) Repeated DOM blocks — hero renders 3-4x, screen readers crawl all copies.
- 2) Emoji-dependent info — country/travel emojis lack aria-label or alt text.
- 3) Testimonials lack semantic structure — reviews are plain text without blockquote.
- With 3M+ users across LatAm, accessible fintech = higher conversions.
- I have a free 1-page WCAG 2.1 snapshot for belo.app. Want it?
- Emilio Ranucoli | Ranuk IT Solutions | emilio@ranuk.dev | ranuk.dev/ada-audits
