- Labels: bounty

- Descripcion: **Description:** LangGraph is the gold standard for stateful agents, but managing long-term memory across disjointed sessions or massive graphs is still a hurdle. We want to see the best example of Memanto acting as the long-term memory layer for a L...

7. Recomendaciones

- PRIORIDAD ALTA: Bounties warpspeedopen-source (440-960 USD) son los mejor pagados. Stack TypeScript/React Native.
- RESEARCH: El bounty de 3000 USD (Cognitive-OS) es ideal para perfil ML/data science de Emilio.
- REPUTACION: Challenges Memanto (100 USD c/u) son rapidos y buenos para ganar visibilidad.
- ACCION INMEDIATA: Aplicar a los top 3 esta semana antes de que se asignen.
- SEGUIR ESCANEANDO: Radar corre cada 6h automaticamente via cron.
