4. Analisis por Fuente

Fuente	Cantidad	Valor Total	Max	Promedio
github	42	\$120,531	\$50,000	\$2,870

5. Recomendaciones

Basado en el analisis de bounties disponibles, se recomienda priorizar:

- Bounties de GitHub con labels 'bounty' + 'paid': mayor probabilidad de pago real
- Repositorios activos (>100 stars, commits recientes): el bounty es legitimo y hay soporte
- Bounties con labels de tech stack alineado (Python, TypeScript): maximiza velocidad de resolucion
- Evitar bounties >\$10000 que parecen budget programs: son tracking issues, no issues individuales

- Filtrar por issues <14 dias de actualizacion: prioridad alta del maintainers
