Service Overview

Our Ad Audit service provides a deep-dive analysis into your advertising ecosystem. We leverage the 'rk-ad-audit' engine to systematically evaluate high volumes of ad content, ensuring consistency, compliance, and performance optimization.

Key Features

1. Automated Bulk Analysis: Process 250+ ad items simultaneously.
2. Performance Metrics: Identify high-performing vs. underperforming assets.
3. Compliance Check: Ensure all ads meet brand guidelines and regulatory standards.
4. Actionable Insights: Receive a detailed report with specific recommendations for improvement.

Technical Methodology

The audit is powered by a custom-built Python engine that parses ad metadata, visual elements, and copy. It categorizes results into actionable buckets, allowing for rapid iteration and scaling of marketing efforts.

Pricing & Delivery

Standard Audit Package: Includes full analysis of up to 250 items, a comprehensive PDF report, and a 30-minute consultation call to discuss findings.
